I am a detail-oriented, reliable and trustworthy individual with a systematic approach to problem-solving and the ability to work in a team environment. I am seeking to advance my career as a software engineer where I can contribute my experience, education, and leadership.

Skills

- JavaScript
- Nodejs
- React
- GraphQL
- CSS
- HTML
- SQL / NoSQL
- Agile

Experience

06/2018 – PRESENT

Student Mentor / Woz-U – Scottsdale, AZ

While working at Woz-U, I have had the opportunity to shape the lives of hundreds of students by teaching and mentoring a variety of different technologies. Included technologies are JavaScript front end (React / Angular) and back end (Express), C#, JAVA, NoSQL, SQL, CSS (Bootstrap), Agile Project Management, HTML and deployment using AWS.

2016 – 2018

Full Stack Developer / C&H Construction – Blairsville, GA

As the lead of a small development team, I organized tasks and workflow for all web-based projects, attended whiteboard meetings, redesigned internal web application to manage take off bids and cost estimation for new construction. I also help create a seamless user experience across the entire application.

2014 – 2016

Full Stack Developer / Lipsey Logistics Worldwide – Chattanooga, TN

As the primary programmer in a large transportation company, I Maintained a large MSSQL database. As well, maintained a legacy ColdFusion application and eventually converted it to React framework. Worked on and developed live dashboards for various departments. Integrated dashboards into Transportation Management System (McCleod). Tracked employee performance with custom reporting tools. Automated email reports based on real-time events using SSRS. Developed a “lane” optimization application for potential bids. Used visual basic to automate reports in MS Excel for accounting department. Created documentation for various applications that were developed. Participated in weekly team meetings using agile methodologies.

2012 – 2014

Full Stack Developer / Visiture – Charleston, SC

Helping eCommerce companies grow their brand online, I worked as a member of the development team. Worked on their internal software that focused on PPC Management, eCommerce Consulting (including SEO) and conversion Rate Optimization. Attended team meetings with upper management and developers to ensure a tight cohesive environment.

2009 – 2011

Full Stack Developer / UPS Corporate Headquarters – Atlanta, GA

I participated in various duties including working with a large team on several ColdFusion projects using MS SQL Database. Created complex SQL Queries using stored procedures and functions. Used Data Transformation Services to normalize data from our data warehouse into relational database tables. Used versioning control extensively to push code from development to production. I also drafted documentation for applications being developed. Worked with QA team to ensure applications always performed correctly. Attending weekly meetings with various departments to ensure efficient product design.

Education

Software Developer Certificate / Coder Camps / Woz U – Online

Learned full stack software development utilizing JavaScript, C# and SQL and other technologies. By the end of the course I had a solid understanding of Front-End technologies such as React and build tools, Back End technologies such as express, databases and web frameworks, as well working on an Agile team using a project management framework such as SCRUM.

Dekalb Community College / Computer Science

Studied Computer Science

University of Alabama / Computer Science & Business

Studied Computer Science and Business
